Summary

Experienced Full-Stack Developer and Team Lead with a strong background in building scalable web platforms, custom CRM systems, and automation tools. Passionate about leveraging AI and modern tools to build smart, efficient, and future-ready systems.

Experience

Full Stack Engineer

Unbelievable digital LTD

2021 - present

Lead Full-Stack Developer | Team Lead

Megaparts.bg, Megabitak.bg, Megacars.bg, accounts.megaparts.bg, app.labcoin.bg, catering.ccc.bg, godzila.bg, keybind.gg, myflat.bg, p2prevention.bg, ideogen.com, dmat.online and many other private CRM systems to improve the client business

- Led a team of 11 developers, managing project delivery, code quality, and team growth.
- Built scalable backend systems using Laravel and Zend Framework, with APIs, WebSockets, queues, CRON jobs and automated systems.
- Developed a network of interconnected platforms with unified user authentication.
- Designed and deployed multiple CRM solutions, boosting client business efficiency.
- Implemented CI/CD pipelines and managed cloud infrastructure on DigitalOcean.

Web developer

Studioweb LTD

2019 - 2020

Extensive experience developing and maintaining custom CMS (Content Management System) solutions tailored to unique business needs across numerous projects.

Web developer

Chopni LTD

2018 - 2020

I began my journey in web development working with popular CMS platforms such as OpenCart, WordPress, and Joomla. (Gained hands-on experience building and customising e-commerce stores, corporate websites, and dynamic content platforms. Developed themes, created custom plugins/modules, and tailored site functionality to meet specific client needs.
